## Tomatoes

Well known for our "UG Crop Shield" which helps to protect against sunburn during the hot summer months, Ultra Gro has a large footprint on the Westside for cannery growers. Recently, we have completed two years of grower demonstration trials that have been successful for increasing yields (see: UG Trial data). As a result of those trials, Ultra Gro has caught the attention of several growers and has expanded acreage of "full-program" customers for the upcoming 2011 growing season.

**Please find out more from our hardworking team:**

**Kern County:** Steve Best, Aaron Hart, Dennis Laux

**Westside:** Marc Suderman, Eric MacBean, Craig Fourchy, James Garcia

**Dos Palos/Los Banos/Merced:** Derek Sissom, Craig Fourchy, Albert Rascon, Rich Kreps

### **SAMPLE PROGRAM FOR TOMATOES**

(Specific Program Tailored for each Grower)

**At Planting:** (per acre) "Pop Up"

2-3 Gallons 8-16-8 Plus (Banded on seed with planter)
